A description is given of the regulating of the heating
of the Still Coke Oven, particularly the Type C oven
with elongated regenerator, and of the operating
conditions before and after regulating. Also mentioned
is the problem of dividing the heating gas, air and ex-
haust in a heating system.

(West Germany) 1961, v. 14 [no. 1] p. 11-17.DESCRIPTION: *Mining engineering. *Television
equipment. Geological survey. Geophysical prospect-
ing. *Well logging. *Boreholes.

With a new television bore-hole-probe, whose outer
diameter is 63 mm, one can obtain by direct measure-
ment graphical and photographic records of bore-holes.
Currently, this method is successful at a depth of 400
meters. The system of television transmission and the
components of the apparatus layout are described and

traction, Dyes, Phenyl radicals, Glycines, *Toxins
(Chemistry).

The paper makes a comparison of an intermittent and a
continuous process for the recovery of aniline from
phenyl glycine solution in a dye plant. The distillation
unit with its accessories is first briefly described.
Next is discussed a tower apparatus for the separation
of liquid mixtures into two components which has found
remarkable success in a great variety of applications.
